In Ms. Baru’s remote area, this process is known as a social autopsy, or verbal autopsy. First, Gulam Mostafa, a government official, sits with family members and caregivers to fill out a short questionnaire designed to help inspectors establish the likely cause of death.

Once this has been determined, Mr. Mostafa organizes a community meeting to explain why the death happened, and how similar deaths can be prevented. Often the solution is as simple as asking community members to give birth in a health facility, under the care of a skilled birth attendant.

These meetings are also an opportunity to dispel misconceptions about health care, such as the widely held belief that health facilities are prohibitively expensive. In fact, maternal health care is often subsidized by the government and UNFPA.

**Lasting impact**

These efforts are having a lasting impact.

"In the last four years, the situation has radically changed," Mr. Mostafa said. "In the past, almost all deliveries were conducted at home, and deaths were very
